# CELEBRATING 140 YEARS OF INNOVATION

This year, we proudly celebrate 140 years since the founding of Landini, the iconic tractor brand that has been a cornerstone of agricultural innovation. Established in 1884 by Giovanni Landini, in the heart of Fabbrico, Italy, Landini began as a wine-making machinery factory. Today, it remains at the forefront of agricultural technology as part of the Argo Tractors group, whose headquarters remain rooted in the same historic location.

Landini's legacy is one of pioneering spirit and relentless dedication to advancing mechanisation, not only in Italy but also across the globe. In countries like Australia, Landini has become synonymous with excellence, particularly in the viticulture, horticulture, and row crop farming sectors.

Driven by our core values of passion and innovation, Landini has consistently pushed the boundaries of what's possible in tractor design and performance. Our commitment to engineering excellence is evident in the fact that Argo Tractors reinvests 6% of its turnover each year into research and development, ensuring that we continue to deliver cutting-edge solutions that meet the evolving needs of modern agriculture.

The results speak for themselves. Over the past two years, Argo Tractors has garnered three prestigious Tractor of the Year awards, with the Landini Rex 4-120GT earning the title of Best Specialized Tractor of 2024.

Our range has grown exponentially, now offering open-field tractors from 60 to 215 horsepower, expanding far beyond our origins in specialty segments. As we reflect on our remarkable journey, we are excited to continue driving forward, fuelled by the same passion for innovation that has defined Landini for 140 years. Our history is rich, but our future is even brighter.

### ROPS & CAB

The Discovery offers heavy engineering with a long wheelbase, coupled with simple specifications and value for money. This enables farmers to get into a new machine that is capable of 1 tonne front end loader lifting capacity, along with supporting larger implements for more efficient 3 point linkage and rear PTO applications.

- ITL Tier II, 4 Cylinder Engines in 60, 75 and 90 hp
- Flat operator platform
- Shuttle transmission with 12+12: 4 gears for 3 ranges (synchronized)
- Draft control
- 2 sets of rear hydraulic remotes
- Mechanical Suspension Seat
- 2 Speed Power Take Off (PTO)
